KITCHEN RETROFIT PROGRAM

CANARY WHARF

81 Kitchens completed

On budget & ahead of schedule

10 weeks

Corporate Client - Serviced Apartments

About the Project

Property Eye Building Services (PEBS) were tasked with completing the kitchen retrofit programme for the Client's serviced apartments in Canary Wharf.

The Client's primary objective was to update the kitchen cabinetry, creating a new and modern feel to the space

Services

The project included replacing all the kitchen door fronts, wall units, hinges, end panels and kick boards from the base unit.

A hurdle faced was that the existing base and wall units were a different size to the ones that are now manufactured.

To overcome the problem each door had to be cut down and an adhesive edging strip ironed on.

At PEBS we strive to be as efficient as possible, which in this case resulted in completing the work in half the time expected.
